DATE MAILED: 02/16/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/765,787	Applicant(s) DARIF ET AL.	
	Examiner Brian K. Green	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 25-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 25-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Dec. 9, 2005 has been entered.

Claim Rejections - 35 USC § 112

Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 30 is misdescriptive since it is not understood how a tear line can have ends separated by a space which is not perforated as defined by the applicant. In the applicant's invention, the tear line would have to include three tear lines, see figure 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3611

Claims 25 and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 in view of Buschman (U.S. Patent No. 4,102,072) and Teter et al. (U.S. Patent No. 6,112,665).

The applicant's admitted prior art in the specification page 1, lines 19-27 and page 2, lines 10-14 discloses the idea of placing paint chips within a rack and the idea of using paint chips with a plurality of color samples on a single card and the idea of covering a paint chip with a single color. The applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 does not disclose whether the display rack includes a wall which covers a chip section and the idea of placing perforations in the card to form a paint chip section.

Buschman shows in figures 1-3 the idea of placing paint color cards (12) within pockets formed on a display rack which includes walls (18a,18,18b) which would prevent the chip section from being grabbed by the prospective purchaser when the prospective purchaser removes the paint color card from the display rack. In view of the teachings of Buschman it would have been obvious to one in the art to modify the applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 by placing the paint color card on a display rack which includes walls since this would help to protect the cards from being damaged and would help to hold the cards in a more secure manner. When the paint color card of the applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 is placed within one of the pockets of Buschman the paint card would be grasped along the top surface of the card when it is removed and the chip section would not be grasped. Teter et al. shows in figures 4 and 5 the idea of placing perforations (14) within a colored section in order to allow the perforated area to be removed. In view of the teachings of Teter et al. it would have been obvious to one in the art

Art Unit: 3611

to modify the applicant's admitted prior art in the specification page 1, lines 19-27 and page 2, lines 10-14 by adding perforations to the color card to form a chip section since this would allow an opening to be formed within the color coated card which would allow better color matching to be performed, as taught by Teter et al., column 4, lines 55-65. In regard to claim 28, Teter et al. discloses the use of a plurality of tear lines which would allow the chip section to be removed from the rest of the card. In regard to claim 29, the applicant discloses in the specification on page 1, lines 10-15 that the use of color cards having multiple colors on each card is known in the art and also discloses in the specification on page 1, lines 23-25 that it is known to place these color cards into racks. It would have been obvious to one in the art to modify the applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 since this would allow a wider range of paint chip cards to be held and displayed in a single rack. Teter et al. discloses making the chip section small so the color swatches on the color strip would have a size greater in every direction than the chip section of the paint color card. In regard to claim 30, as best understood, the applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 in view of Buschman and Teter et al. does not disclose placing an unperforated space between the tear lines and including a fold line in the unperforated space. It would have been an obvious matter of design choice to modify applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 in view of Buschman and Teter et al. by making a space between the tear lines non-perforated since the applicant fails to define any advantage to making the space non-perforated and the perforated space defined by Teter et al. would work equally well. Further, the chip section taught by Teter et al. could be partially separated from the rest of the card and pivoted along the remaining attached perforated section.

Art Unit: 3611

Claims 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 in view of Buschman (U.S. Patent No. 4,102,072) and Teter et al. (U.S. Patent No. 6,112,665) as applied to claim 25 above and further in view of Edwards (U.S. Patent No. 4,992,050) or Goldsholl (U.S. Patent No. 3,224,113).

The applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 in view of Buschman and Teter et al. disclose the applicant's basic inventive concept except for placing a color coating on the back of each chip section. Edwards discloses in the abstract the idea of placing a first color of paint on a first side of a chip section and a coating of paint on the opposite side of each chip section. Edwards discloses that the paint on the second side has a different finish as compared to the first side. Goldsholl discloses in column 1, lines 59-62, the idea of placing paint on the front and back surfaces of a paint card. In view of the teachings of Edwards or Goldsholl it would have been obvious to one in the art to modify applicant's admitted prior art in the specification page 1, lines 10-27 and page 2, lines 10-14 by placing a coat of paint on the second surface of each chip section since this would allow more colors/finishes to be displayed by the color card. In regard to claim 26, it is considered within one skilled in art to place the same color on the back of each chip section as on the front since this would allow the color of the paint to be seen on either side of the chip section, i.e. easier and quicker to determine the paint color shown by the color card. In regard to claim 27, the colors on each side of the paint chip sections of Edwards are considered to be of the same color but would have different compositions. Further, as indicated above, placing a coat of paint on the second

Art Unit: 3611

surface of each chip section would allow more colors to be displayed by the card, i.e. one color on the front of the card and a second color on the back of the card. Also, when different finishes are used the colors would be slightly different.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but most are moot in view of the new ground(s) of rejection.

The applicant argues that claim 30 is definite since the three tear line can be viewed as one tear line. The examiner disagree since if the three tear lines were viewed as one tear line then it would no longer be a "line".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K. Green whose telephone number is (571) 272-6644. The examiner can normally be reached on M-F 7am-3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on (571) 272-6651. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
